

CONTOUR SPEAKER

The Contour is an outdoor speaker with a sleek low-profile design that is as equally at home in the landscape as on a hardscape.

The custom coaxial driver features a fractal wave guide for improved efficiency outdoors. With a color-through rotomolded enclosure and fully concealed wiring, this speaker offers the perfect array of features to make it a clear choice for outdoor sound.

U.S. Design Patent D962,192 S

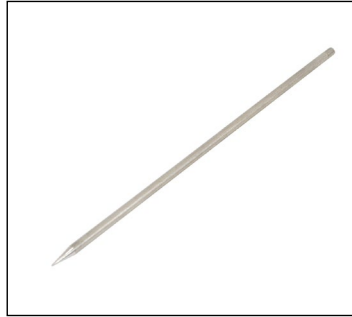

-  **Design** - Superior sound quality flows from the rigid solid composite one-piece enclosure, custom drivers, fractal wave guide, and high-quality component crossover. Its sleek design allows big performance out of a small visual footprint.
-  **Flexibility** - This speaker is designed for installation versatility. Utilizing multiple mounting options, it can be easily hidden in a landscape, installed in a hardscape, or even mounted under a soffit.
-  **Materials** - Featuring high-quality rotomolded composite with construction intended to Defy the Elements. Contour Speakers feature a color through enclosure, plus a multi-layer environmental grill adds another layer of protection.
-  **Performance** - Contour features a custom coaxial driver with a 1" tweeter and a 5.25" mid-bass woofer. A specially designed fractal wave guide acts as the tweeter bridge for improved efficiency outdoors.
-  **System** - Contour is built to be part of a complete patented Coastal Source Plug+Play™ system or can be easily integrated into existing systems.

COMPATIBLE PRODUCTS

CAMLOCK CONNECTOR

Applications: The CamLock Connector allows for quick and reliable connections when using our CamLock cable for wiring.

STAINLESS STEEL GROUND SPIKES

Applications: Four of these Stainless Steel Ground Spikes are able to thread directly into the bottom of the Contour speaker to secure it in the landscape.

DIRECT CONNECT CMC/CC Y-CABLE

Applications: The Trunk & Branch Y-Cable allows for easy connections to our patented Coastal Connector cabling system.

FEMALE IN-FIELD SPLICE (CMC)

Applications: The CMC In-Field Splice allows traditional speaker wire to be used with the Contour speaker while maintaining a watertight seal.

The Coastal Source outdoor audio system sounds amazing! The audio line is simply Plug+Play™ and the whole system is designed to function as one. The engineering and durability is unmatched.”
