

CUBE

CUBE makes outdoor music more three-dimensional. It provides audiophile bass from a classic, compact shape that blends into your landscape and provides years of outstanding performance in even the most challenging environments.

Each elegant 17-inch enclosure houses a powerful 10-inch bass driver with 350 watts of power handling. CUBE can be placed anywhere on your property, to provide a flexible bass system without the need to upset your landscape scenery.

Cube is offered with your choice of two beautiful stone tops — Travertine or Granite — and gives you the opportunity to fabricate a top of your own material, to further your landscape design.
