**Programming Instructions** 

Alfred INC. reserves all rights for the final interpretation to this instruction.  $\triangle$  All design and specifications are subject to change without notice

# Warnings

Failure to follow these instructions could result in damage to the product and void the factory warranty.

The accuracy of the door preparation is critical for the proper functioning and security of this product. Misalignment can cause performance degradation and lessening of security.

Finish Care: This lockset is designed to provide the highest standard of product quality and performance. Care should be taken to ensure a longlasting finish. When cleaning is required use a soft, damp cloth. Using lacquer thinner, caustic soaps, abrasive cleaners or polishes could damage the coating and result in tarnishing.

## (A CAUTION

IMPORTANT: Do not install batteries until the lock is completely installed on door.

- 1. Master PIN Code(4~10 digit): Default master PIN code is "12345678", please modify it after installation.
- 2. User PIN Code Number: User PIN codes can be set up with PIN code numbers (00~19).

3. User PIN Code(4~10 digit): User PIN codes can be set up only through Master PIN code or Alfred APP. Each User PIN code has only one PIN Code Number.

# Introduction

The Alfred DB2 combines a robust lockset with a contemporary electronic aesthetic.

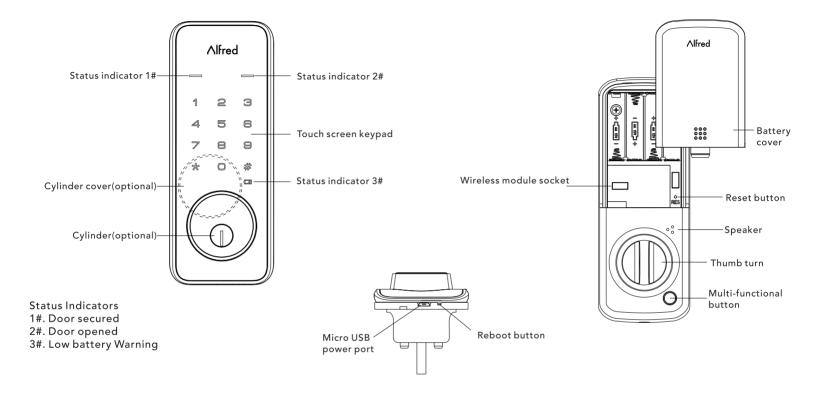

Users benefit from an interactive touch screen that makes day-to-day access effortless, as well as offering voice-guided programming for simple updates to user information in the event of staffing changes or security breaches. Alfred DB2 is engineered for quick and easy installation and fits in place of a standard deadbolt lock door prep.

If this is an Wireless-enabled lock, it needs to located within 50-100 feet of another network controller(Gateway). That distance is influenced by objects between the lock and the controller and may be expended depending on proximity to other network devices. Also, if the lock is connected to a network controller, it is recommended that it is programmed through the centralized user interface(PC or hand-held device) to ensure communication between the lock and the controller unit.

# Programming

# (A CAUTION

1. You can operate following the voice guide.

2. Master and User PIN code have 4-10 digits, the default Master PIN code is [12345678]. Please change it prior to programming of the lock.

# Definitions

#### **Master Mode:**

The Master Mode could be entered by entering "\*\*+Master PIN Code+#" to programming the lock.

#### Master PIN code:

The Master PIN Code is used for programming and for feature settings.

#### (A CAUTION

The default Master PIN Code must be changed after installing. The Master PIN Code can unlock the device anytime.(including Away Mode and Privacy Mode)

#### Auto Re-lock:

After successful PIN Code entry or APP access and the unit unlocks, it will automatically re-lock after 30 seconds. This feature is disabled in default setting. Could be set up in Master Mode or through Alfred APP.

#### Manual Mode:

Auto Re-lock function could be adjusted to Manual Mode. In Manual Mode the lock could be locked only by pressing any key for 2 seconds from outside or using thumb turn or Multi-functional button from inside.

#### **One Touch Re-lock:**

When the bolt is retracted, activating the keypad and press any key for 2 seconds will extend the bolt(during Auto Re-Lock duration or when Manual Mode is enabled)

#### Shutdown Time:

The lock will shutdown for a default of 5 mins and not allow operation after the wrong code entry limit(10 times) has been met. When the unit is in Shutdown, the screen will flash when you are trying to use keypad.

#### Away Mode:

This feature is enabled by the Master PIN Code in Master Mode or Alfred APP, it restricts all user PIN code access, except Master PIN code and APP access. This feature will disabled automatically after entering Master PIN Code from outside or using APP. If someone unlock the unit by using thumb turn or Key override, the lock will alarm for 1 min and send a message to user's hand-held device for warning(requires wireless module).

#### Silent Mode:

Enabling Silent Mode shuts off the code confirmation tone playback for use in quiet areas. Silent mode is selected in the Voice setting of Master Mode or Alfred APP.

#### Status LED:

Located on outside escutcheon.

#### User PIN code:

The User PIN code operates the lock. Maximum number of user PIN codes is 20.

#### Wrong Code Entry Limit:

After a specified number of unsuccessful attempts at entering a valid PIN code the lock will shut down and not allow operation. Wrong code entry limit is 10 times.

#### **Reboot button:**

When the system crash down, the lock could be restart by pressing Reboot button on outside escutcheon.

#### Reset button:

After reset operation, the lock will be restored to factory default settings, all user credentials will be deleted. Refer to reset guide.

#### Privacy mode:

After holding the multi-functional button for 3 seconds, the lock will be set to Privacy mode, it restricts all user PIN code access, except Master PIN code and APP. This feature will disabled automatically after entering Master PIN Code or using APP access from outside, or someone unlock the unit by using thumb turn or override key(optional).

# Factory Default Settings

Settings	Factory Defaults	
Master PIN Code	12345678	
Auto Re-lock	Disabled	
Speaker	Enabled	
Wrong Code Entry Limit	10 times	
Shutdown Time	5 mins	
Voice guide language	English	
Bluetooth	Disabled(Energy saving)	

# **Lock Operation**

# -Change Master PIN code

**1.** Touch the screen with your hand to activate.

2. Enter "\*" twice and the 4-10 digit Master PIN Code followed by "#". Lock Response: Voice guide

3. Enter "1" to change Master PIN code. Lock Response: Voice guide

Away Mode will be disabled automatically after entering Master PIN Code or using APP access. If someone unlock the unit by using thumb turn or override key(optional), the speaker will give alarm.

# -Bluetooth settings

#### Bluetooth feature can be programmed through the Master PIN Code or Alfred APP. Bluetooth is disabled in factory default setting.

- 1. Touch the screen with your hand to activate.
- 2. Enter "\*" twice and the Master PIN Code followed by "#". Lock Response: Digit 1-8 on keypad light up.
- 3. Enter "7" to enter Bluetooth settings.
- 4. Enter "1" to enable Bluetooth, Bluetooth will work continuously after operation.
- 5. Enter "2" to disable Bluetooth, Bluetooth will shut down in 2mins after touch keypad lights off for energy saving, it will back to work when touch keypad wakes up.

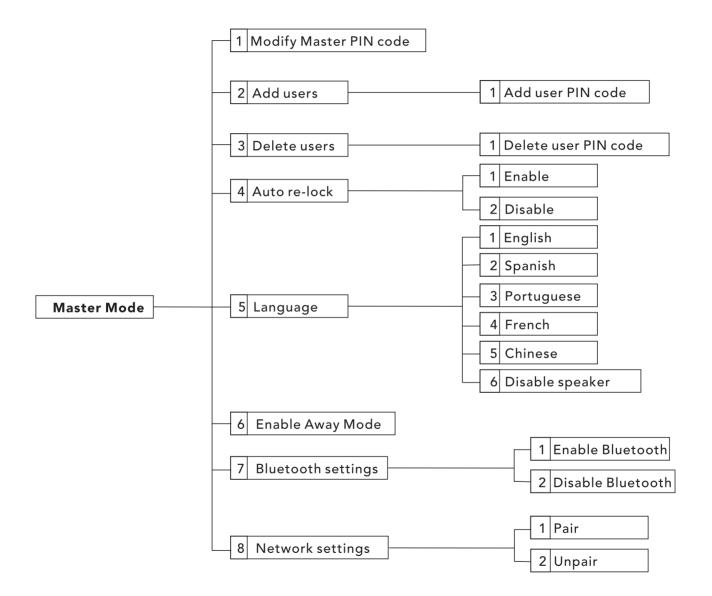

# -Function extension settings (optional)

Network features are included in function extension, can only be programmed through the Master PIN Code. Refer to Network setting introduction.

### A CAUTION

If the lock is connected to a network controller, it is recommended that it is programmed through the centralized user interface(PC or hand-held device) to ensure communication between the lock and the controller.

# Feature Programming Through Menu Mode using Master PIN Code

# How to use

# Unlock the door

#### 1. Unlock the door from outside

- Use PIN code kev

#### 2. Unlock the door from inside

- Manual thumb turn

Turn the thumb turn on inside body

# Lock the door

# 1. Lock the door from outside

#### Auto Re-lock Mode

In Auto re-lock mode, the bolt will be throwed out automatically in 30 seconds after unlock.

#### Manual Mode

Press and hold any key on keypad for 2 seconds.

### 2. Lock the door from inside

### Auto Re-lock Mode

In Auto re-lock mode, the device is locked automatically.

# Manual Mode

In Manual Mode, the device could be locked by pushing Multi-functional button or turning the thumb turn on inside body...

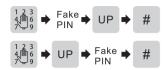

# **Enable Privacy Mode**

As locking the door, push Muilti-functional button on inside body for 3 seconds, the lock will be set to Privacy mode, it restricts all user PIN code access, except Master PIN code and APP. This feature will disabled automatically after entering Master PIN Code or using APP access from outside, or someone unlock the unit by using thumb turn or override key(optional).

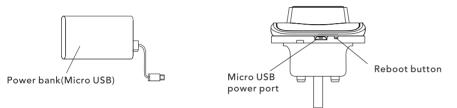

# How to use

# Unlock with Fake PIN code

User can prevent PIN code exposure from strangers by entering random digits before or after PIN code.

# Micro USB emergency power supply and Reboot button

- Door lock can be connected to micro USB power bank when battery wears out.

- Door lock can be restarted by pressing Reboot button when crash down.

# Reset to factory default settings

**Operations on lock** 

- 1. Open the door and keep the lock in "unlock" status
- 2. Open battery box and find the reset button.
- 3. Use a sharp thing to press and hold the reset button.
- 4. Keep holding the reset button and remove a battery from battery box then replace it.
